

# ICONIC INSIGHTS

## Patiently Waiting on Bonnie Claire PEA

Outside of the past Covid -19 related difficulties for normal business activities, it's reported most labs & metallurgical facilities throughout North America, have been in significant demand. It is expected that the backlog will break soon. Iconic's PEA , the Technical Report, is a prime milestone, patiently awaited by Iconic for its publication.

## Always Conscious of the Environment...

As Iconic's Plan of Operations is assembled over the coming months, a commitment has been made to the importance of sensitive environmental issues. Iconic pledges excellent stewardships of its claims and to reach beyond the International Council of Mining & Metals (ICMM) standards.

## Producing Lithium...

[Watch this Video](#) - Richard Kern

**Battery Metals**, were valued at \$11.3 billion in 2019, and are projected to reach \$20.5 billion by 2027. As numbers grow, a recycling question awakens with lithium-ion cells, beyond smaller batteries used in consumer electronics, relatively few lithium-ion batteries (compared to lead-acid batteries) have reached the end of life stage because they haven't been in the market all that long and they last a very long time.

**Further**, because lithium isn't a toxic heavy metal like lead, there has been far less pressure to recycle these batteries. Nevertheless, a recycling issue will have a growing profile as growing numbers of lithium-ion batteries reach the end of their usable life. The good news is that there are companies that are working on it. Li-ion batteries can be recycled at rates as high as lead-acid batteries, but the issue has simply not yet been viewed as one of critical importance, as of yet.

# INSIGHT...

Looking to be respected as good stewards of our lithium resource requires following state & federal laws, especially pertaining to the environment.

Selecting and contracting highly experienced professionals with strong technical expertise, then engaging a proficient team of Geologists, Biologists, Botanists, Archaeologists, Environmental and Geographic Information System (GIS) specialists is key. They will plan, conduct, manage comprehensively, efficiently, and cost-effectively, Iconic’s Bonnie Claire Project in its progress towards lithium production.

“Iconic has aligned itself with a highly respected firm to provide a Scope of Work for Bonnie Claire, which will be included in its diligent Plan of Operations, one that will meet and complete all multi disciplinary environmental compliance...”

- Richard Kern, President, CEO & Director

## In the Mean Time...

Joint Venture Partner Nevada Lithium Resources Inc. has filed its long form prospectus as of May 14, 2021. The full document can be reviewed at [www.sedar.com](http://www.sedar.com).

Through its wholly owned subsidiary Nevada Lithium Corp., has an option to acquire a 50% interest in Bonnie Claire through 3 phases, specified in the Earn-In Agreement, of Nov 30, 2020 amended on Dec 14, 2020, Dec 23, 2020, and May 3, 2021. Represented in the Agreement is the Phase I Option, which has completed expenditures of an aggregate amount of US\$1,600,000 to acquire a 20% interest in Bonnie Claire. Nevada Lithium may acquire an additional 15% pursuant to the Phase II Option by completing the required expenditures of an aggregate amount of US\$2,000,000 on or before October 1, 2021, and a further 15% pursuant to the Phase III Option by completing the required expenditures of an additional US\$2,000,000 on or before Dec 1, 2021.

Phase I Option	-	December 31, 2020	US\$ 300,000	(completed)
	-	January 8, 2021	US\$ 180,000	(completed)
	-	February 8, 2021	US\$ 720,000	(completed)
	-	March 8, 2021	US\$ 400,000	(completed)
Phase II Option	-	October 1, 2021	US\$2,000,000	
Phase III Option	-	December 1, 2021	US\$2,000,000	
TOTALS:			US\$5,600,000
